

NOTE: First follow all instructions for the Enforcer Grille Guard. Then follow these additional instructions to attach the Over-The-Hood Bar Section.

NOTE: It is recommended that two people position and support the Over-The-Hood Bar during initial installation.

1. Carefully position the Over-The-Hood Bar Section onto the top of the Grille Guard, aligning middle vertical bars over the Receiver Posts on the Grille Guard. (See Photos 1A & 1B)

2. Carefully lower the Over-The-Hood Bar Section onto the Grille Guard Receiver Posts. Continue to support the Over-The-Hood Bar Section. (See Photo 2)

3. Once the Over-The-Hood Bar Section is in the Receiver Posts, slip washer onto Quick-Release Bolts. (See Photo 3)

4. Thread Quick-Release Bolt with washer from underside of Grille Guard and into Over-The-Hood Bar Section. Tighten securely. Note: Do not overtighten. (See Photo 4) Repeat for other side.

5. You are now finished. **Important:** Periodically check that all brackets, nuts and bolts are tight and secure.
